

NEW DEVICE PROVIDES PROTECTION BEYOND DOUBT

Tony Creanor has spent years protecting members of the public, but his career, even his life can be threatened in a split second.

And if he is alone when an incident occurs, it's his word against the defendant's. According to Tony the nature of his work means it happens all too frequently. "I am constantly subjected to false allegations, threats and potentially damaging claims," he says, "which can take months to finalise."

Now a state-of-the-art device the Vidmic gives law-enforcement proof - beyond doubt. For police this is particularly good news. The Vidmic is a fully operational mic that attaches to your existing radio. It requires no extra equipment or battery packs and boasts a full colour digital video recorder, still photo camera and digital audio recorder.

According to Tony it can help instantly diffuse a potentially dangerous situation. "At a recent public event, I was threatened by an irrational, vocally abusive person," says Tony. "When informed he was being recorded the aggression subsided immediately."

Tony says the simple fact that video/audio proof exists can also prevent a matter reaching court. "Since using the Vidmic, I have avoided countless unnecessary investigations, because indisputable evidence exists," says Tony.

Hayden Stafford from SASAA, exclusive distributors of the device says the Vidmic is ideal in public security work but particularly beneficial for police. "Members can avoid weeks, even months on suspension waiting for court outcomes," he says.

Hayden who has 20 years security

industry experience and holds a Diploma in Security and Risk Management says the Vidmic is the best recording device he has seen. "With no extra components it is less bulky and does not impede movement," he says.

The Vidmic normally retails for \$990 (inc GST), however SASAA is offering Victoria Police Association members a special price of \$900

(inc GST). Your integrity and career are priceless – Call now.

For more information on the Vidmic call Hayden Stafford on 0419 003 702 or visit www.vidmic.com.au.
